We launched Wizz Air with the strong belief that air travel should not be a privilege. That we will create a world of opportunity for all through affordable travel. And we are delivering on that promise.

And while we gave the freedom to travel to more and more people, we have also proven that growth and sustainability can be achieved hand in hand. While breaking down barriers between people and air travel, we’ve also shown a whole industry how aviation can be more sustainable.

Crucial business model and design decisions, from pricing to seat density make sure we fly with high load factors. We’ve never even thought about business class seats. Or a hub-and-spoke model. Or substituting short train rides for flights. We’ve instead focused on flying with the youngest, most efficient fleet and the most modern engines possible, to consume less fuel.

This all delivers the lowest CO2 emissions per passenger kilometre in the industry, beating not just legacy carriers, but also low-cost airlines operating in a similar way as us.

A plane will never be greener than a train or an electric vehicle. But we are and will be the greenest choice of flying. Because when it comes to a crucial issue like sustainability, we believe in the facts of today. Not promises of the future.
